HCLTech Career Shaper LMS Deliverable | Official Project Submission

Retail Inventory Management System (RIMS)

Project Code: PRG_RIMS_001 | **Project Domain:** Retail | **Client Context:** XYZ Retail Corporation

Complete Project Source Code Compilation Deliverable

Document Type:	Official Source Code Deliverable (Full-Stack)
Project Name:	Retail Inventory Management System (RIMS)
Project Code:	PRG_RIMS_001
Project Domain:	**Retail** (Multi-Location Inventory, Warehouse, Store & Omnichannel Operations)
Client Context:	XYZ Retail Corporation
Backend Stack:	Java 17, Spring Boot 3.3.5, Spring Data JPA, Spring Security, JWT, Maven
Frontend Stack:	React 18, TypeScript 5.5, Vite 5.4, Tailwind CSS, Recharts, Lucide Icons
Database:	PostgreSQL 16 Relational Database + Flyway Migrations
Cloud Deployments:	Frontend: Vercel (https://hclproject-alpha.vercel.app) Backend: Render (https://rims-backend-31um.onrender.com)
Total Source Files:	**182 Source Files** (Zero omitted, exact source code)
Total Source Lines:	**18,183 Lines of Code**
Compilation Date:	October 31, 2026

Project Scope & Implementation Summary:
This deliverable contains the complete, unabridged, production source code for the Retail Inventory Management System (RIMS). It includes all 8 core project epics: (1) Product Catalog Management with EAN-13 barcode generation, (2) Multi-Location Warehouse and Store hierarchies, (3) Real-Time Inventory Tracking with pessimistic row locking and low-stock alerts, (4) Inter-Store and Warehouse Stock Transfers, (5) Supplier Management and Purchase Orders, (6) Omnichannel Order Fulfillment with atomic inventory allocations, (7) Customer Returns and RMA workflows, and (8) Executive Analytics Dashboard, 10 KPI indicators, and Tabular Reports. All code is preserved exactly as written, formatted with line numbers, and categorized into logical architectural tiers.

Table of Contents

Overview of all source modules included in this compilation:

#	Section / Module Category	Files	Lines of Code
1	PART I: DATABASE ARCHITECTURE, SQL SCHEMAS & MIGRATION SCRIPTS	4	1,188
2	PART II: PROJECT ARCHITECTURE & BUILD CONFIGURATIONS	14	503
3	PART III: JAVA SPRING BOOT BACKEND SOURCE CODE	123	7,783
4	PART IV: BACKEND AUTOMATED TESTS (JUNIT 5 & MOCKITO)	5	532
5	PART V: REACT 18 TYPESCRIPT FRONTEND SOURCE CODE	36	8,177
	TOTAL COMPILATION	**182**	**18,183**

Itemized File Manifest by Section:

PART I: DATABASE ARCHITECTURE, SQL SCHEMAS & MIGRATION SCRIPTS

PostgreSQL relational schemas, constraints, foreign keys, b-tree indexes, and seed data. (Total: 4 files, 1,188 lines)

FILE [1/4]: DATABASE_SCHEMA.sql
